

First Mambo Memecoin on Kasp

\$ROARR (Ticker name not revealed yet, Roarr is a placeholder)

\$ROARR the KING of COINS

Max Supply:

44'000'000 Tokens

Public Minting:

4'400'000 Tokens (10%) Tokens per Mint: 100

1 Kas per mint gets 100 tokens. The Kas goes to the Kasp miners. Only 44'000 possible mints.

8'800'000 tokens (20%) for liquidity pools

Fair launch according to Mambo's dump protection approach:

Open Presales for all with widespread distribution at lowest price.

28'600'000 Tokens (65%) for sales

70% of funds from sales will be used for liquidity and dump protection price support

1.2 Million (2.72%) tokens for rewards of active Mambo fans, community members, meme designers and content creators

0.5m (1.13%) for Mambo Legacy holders

0.5m (1.13%) for Mambo Management

Total premint: 39'600'000 tokens.

Open Sales: 28'600'000 Tokens = 65% widespread sales!

The goal is a fair widespread distribution of lowest price for **733 individuals**:

3 Price Levels, Level 1 & 2 are cheaper than minting. You get more tokens for your Kas.

Level 1: Pool 22 mio tokens 50% : Ticket size: 200 Kas get 30'000 tokens (1 Kas = 150 tokens)

For Level 1 price you must prove to be an individual with username following x.com/MamboCoins AND join telegram group t.me.Mambotoken - no robot accounts!

Level 2: 3.6 mio tokens (150 lots only, no username required)

Fix amount per wallet: 400 Kas get 42'000 tokens. (1 Kas gets 105 tokens)

Level 3: Rest salespool 3 mio tokens & unsold Level 1 & 2: 1 Kas gets 50 Tokens!

Minimum 500 Kas get 25'000 . Maximum 5000 Kas get 250'000 tokens per Wallet.

Maximum L1 + L2 + L3 = 5600 Kas per Wallet and username. 5400 Kas without username.

Examples: You buy (with username revealed) for maximum 5600 Kas:

1) You get L1 30'000 + L2 42'000 + L3 250'000 = Total 322'000 tokens

2) You buy without username for max 5400 Kas: L2 (400 Kas) 42'000 + L3 5000 Kas = 250'000, Total 292'000 tokens.

Once a pool is sold out, the price of the available higher pools will apply.

Unsold tokens from Level 1 and 2 will be put to Level 3 pool after about 2-4 weeks from launch.

Remark: it is cheaper to mint then to buy at Level 3.

First pay first serve. If you pay but pools is sold out, you'll be refunded. If you pay more than max 5600 per wallet, we'll refund what was over the limit (minus 30 Kas handling fees). If you pay after the official sales is closed, you be refunded minus 50 kas fee.

Unsold tokens: After about 6-8 weeks from launch we will put on the marketplace at **5x to 10x, 100x, 1000x and 10000x or more of L3 price.**

This guaranties a widespread mixture of many individuals aping in a lowest price and **prevents whales holding accumulations at lowest prices. Ideal dump protection. Whales are welcome to mint and buy at L2 and L3, and they too get their share of L1.**

Where to buy \$ROARR at launch?

The OCT order Form will be on <https://Mambo.Li> .

1. Fill the form with planned amount, wallet address, optional username from x or tg.

2: Pay KAS to our wallet

3: Get the tokens to the wallet you gave in the application. (Up to 2 weeks after deployment.)

We plan to build our own automated fixed rates exchange, specially for solidcoins and fair launches in future.

Roadmap of ROARR

ROARR is a Memecoin. No real utility than fun to ape into unique ticker memecoins.

Mambo hopes it goes to the moon. There is a reward pool for active meme content creators.

BUT: This first Memecoin from Mambo on Kaspa will be the

King of the Mambo Memecoins family and King of all Memecoins.

Mambo plans to make a cascade of dependency form one Memecoin to the other.

In order to buy Meme 2, you must pay with Meme 1. In order to buy Meme 3, you must pay with Meme 1 or 2.

To get early access to Mambo **solidcoins** (better than stablecoins) you may need to hold or pay with Mambo Memecoins.

Mambo believes that the uniqueness of KRC20 Ticker names has an 1000x better potential than average memecoins of other chains with multiple imitations and no uniqueness.
